

TRANSEPT CONSULTING LTD

Transept is an independent transport planning consultancy specialising in intelligent transport systems, public transport co-ordination and sustainable transport solutions.

Transept is a co-operative, owned and democratically controlled by its employees, who are the company's most important asset. The broad knowledge and skills base of our staff enable us to deliver a diverse range of specialist services, while the structure of the business means that we offer a consistent level of personal involvement and commitment to our clients.

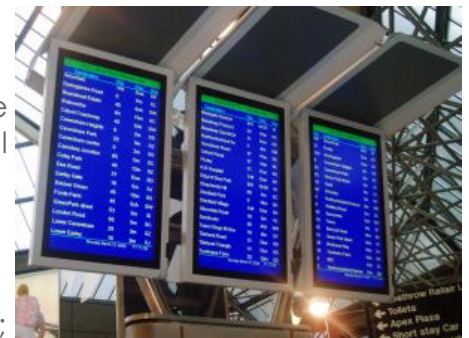

We work to develop strong client relationships and partnerships, enabling us to deliver bespoke solutions to meet objectives on time and on budget.

REAL TIME INFORMATION SYSTEMS

At Transept we have been providing consultancy advice on the planning, implementation and ongoing management of Real Time Information systems since 1999.

Our experience includes;

- Development of strategies for the introduction of RTI systems;
- Developing Functional Specifications for proposed RTI systems, and contracts for their supply, installation and maintenance;
- Advice on the planning and implementation of pilot RTI systems;
- Management of integration issues in relation to other ITS systems;
- Development of data management protocols for local authority and bus operator partners;
- Ongoing scheme and data management support.

Our staff form an invaluable link between local authorities, bus operators and equipment suppliers, providing support to all parties throughout the process. Transept's involvement spans all aspects of scheme planning, implementation and management, from inception to delivery. We also strongly believe in providing ongoing support to our clients, which may include areas such as the reporting of maintenance issues and the management of back-office timetable data.

If you would like to know more information about the services we can provide for real time information systems please contact info@transept.co.uk.

PUBLIC TRANSPORT DATA MANAGEMENT

Transept specialise in public transport data management, maintaining both Bus Timetable and NaPTAN Bus Stop databases for a number of authorities in the Thames Valley. We are able to manage and administer changes to services; submitting data to the national Traveline journey planning portal and producing timetable and publicity displays for individual bus stops.

We are passionate in our work, and proud to maintain consistently high accuracy levels for both timetable and NaPTAN bus stop data.

Transept also provide professional advice on a range of bus, rail and community transport issues; producing public transport strategies including LTP, and leading on the development and marketing of public transport schemes including Park & Ride and Quality Bus Corridors.

SMART TICKETING AND CONCESSIONARY TRAVEL SCHEMES

Transept has been involved at all levels of concessionary travel schemes. Experience includes the specification and management of smart ticketing schemes, and provision of advice prior to the inception of ENCTS in April 2008. We currently manage 'in-house' card production for ENCTS on behalf of our clients, and provide ongoing scheme administration.

Our work involves ongoing support to TCA's relating to operator reimbursement, including analysis of average fares and reimbursement factors.

SUSTAINABLE TRANSPORT

Transept have extensive experience in the field of travel planning, having played a major role in managing and undertaking the School Travel Plan and Safer Routes to Schools programmes for Reading Borough Council.

We are also able to undertake sustainable transport audits, as well as producing Transport Assessments and bespoke Travel Plans, specific and workable for individual situations.
